THE LID

Introducing the high-quality DIAMOND electrical installation junction boxes, designed even for the most demanding environments. They are available in six sizes and several versions to suit different types of installations. They combine a modern look with maximum practicality and reliability. The integrated seal between the lid and the box body ensures a high level of protection against dust and water. Membrane cable entries allow quick and convenient routing of both cables and pipes, while guaranteeing perfect sealing. Each DIAMOND box is supplied as standard with wall-mounting brackets, plugs providing double protection, and a highly practical cord for holding the lid. The product is protected by a registered utility model, confirming its innovative design and high manufacturing quality.

ACCESSORIES

METAL SUPPORT RAIL

TS KKD 90 | TS KKD 115 | TS KKD 135 | TS KKD 160 | TS KKD 200 | TS KKD 250

- mounting rail for device
