Discover our top-quality installation boxes, offering the perfect solution for demanding environments. Available in four different sizes and two color variants. These boxes combine style with maximum functionality. The integrated sealing between the lid and the box itself ensures high protection against dust and water ingress. Membrane entries make it easy to install cables and pipes, ensuring a perfect seal. Each KSK box is supplied with stainless steel screws and caps for the screw heads, guaranteeing long-term durability and an elegant look. Additionally, the boxes are designed for the installation of special terminal plates with five separate terminals. This product is protected by a utility model, which shows, it's an innovative design and top quality.
